

PROFESSIONAL STAFF CONSULTING ACTIVITIES

The Nebo School District Board of Education employees many professional staff members of high quality. Recognition of this quality results in staff members being requested to serve school systems, governmental, and other organizations as paid or unpaid consultants.

It is believed that both the Nebo School District and the person involved profit by such consulting assignments. Staff members should be free to accept such consulting assignments so long as they do not substantially interfere with the staff member's employment with Nebo School District. Those wishing to accept consulting assignments during contract time must first obtain permission from the Superintendent or take personal leave.
